Tuesday – Thursday

**Alfresco Hack-a-Thon**  
September 12, 2024  
Thursday 2–10 p.m.

[Registration open](#)

# Packages

Join the conversations with your Alfresco developer community in this three-day technical training event and Hack-a-Thon.

- **Two hands-on training tracks** explore both Alfresco Fundamentals and Advanced concepts for developers just getting started with Hyland’s Alfresco platform, as well as seasoned Alfresco developers.
- The Advanced track explores the newest in Alfresco capabilities — including high-performing search leveraging Elasticsearch, developing an event listener capable of tailoring content management tasks to meet specific business objectives, and leveraging AI.
- **We’ll conclude the conference with a Hack-a-Thon** that is as much a social event as it is a coding one.

For those unable to attend the entire three-day Alfresco TechQuest event, register for solely the Hack-a-Thon and join your peers in a full day of project development and collaboration.
